The following document is strictly confidential and should not be shared without the consent of Alebrije Estudios.

The purpose of this document is to provide any possible client with information related to the operation of Alebrije Estudios, and our portfolio and experience.

All concepts, names and ideas are property of Alebrije Estudios or the listed companies and likewise should be considered confidential.

WE CREATE DEVELOP PLAY

Alebrije Estudios develops videogames and applications for mobile devices. We provide a finished product ready to be released in the main app stores, with great visual and technical quality. If you have just a general idea for an app or a completely detailed project that just need to be executed, we can help you.

We offer a native development designed for each mobile system, providing a fluid and satisfactory experience for the final user. Our experience in both videogames and applications lets us combine the best of them in each of our projects.
Our experience and the opportunity to offer all these benefits in a cost-effective proposal is what makes our company your best option for mobile development.

GAME JAMS

We participate on a game jams every 1 or 2 months. Usually we are the local host of any international well known game jam that takes place on the same weekend as our development.

When there aren’t, we create our own theme, the main purpose is to test new concepts and technologies, and take risks experimenting with new visual dynamics and gameplays.
